

ALCOHOL, PHENOL & ETHER

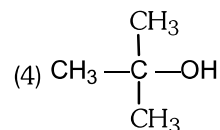

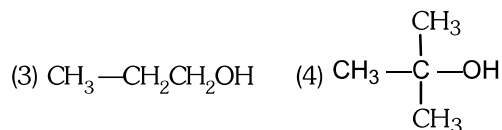

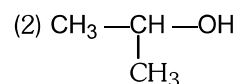

(3) 1 & 2 both

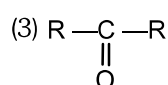

3. Catalytic reduction of butanal gives—

4. Reaction of propanone with CH_3MgBr followed by hydrolysis gives—

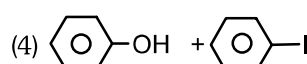

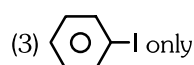

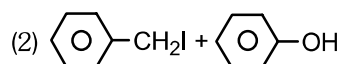

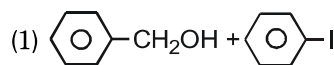

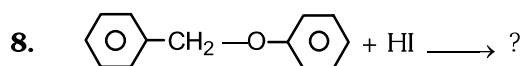

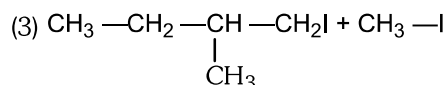

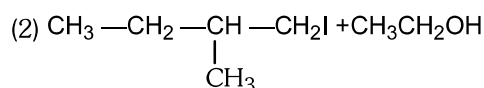

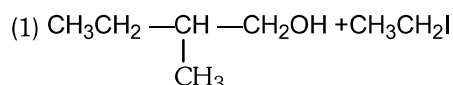

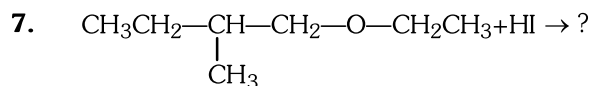

5. $\text{R}-\text{COOH} \xrightarrow[\text{(ii)H}_2\text{O}]{\text{(i)LiAlH}_4} ?$

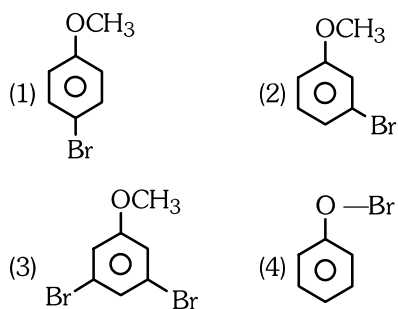

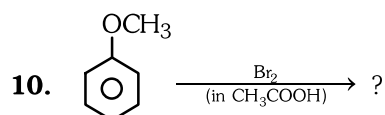

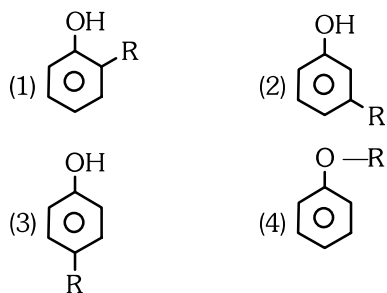

6. Order of boiling points is—

Pentan-1-ol, n-butane, pentanal, ethoxyethane

(a) (b) (c) (d)

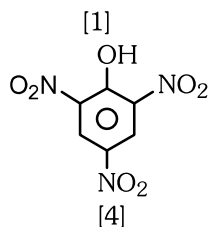

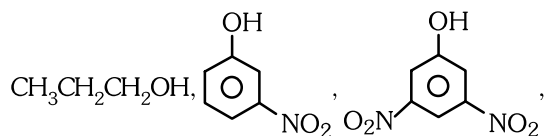

11. Ortho and para nitrophenols are separated by-

- (1) Simple distillation (2) Steam distillation
 (3) Fractional distillation (4) Vacuum distillation

12. Acidic strength order is-

- (1) $4 < 3 < 2 < 1$ (2) $2 < 1 < 4 < 3$
 (3) $1 < 2 < 3 < 4$ (4) $3 < 2 < 1 < 4$
