

CHEMISTRY IN ACTION

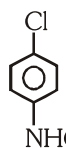

1. The compound  is used as –
 - (1) Antiseptic
 - (2) Antibiotic
 - (3) Analgesic
 - (4) Pesticide
2. The correct structure of drug paracetamol is –

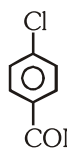

(1)

(2)

(3)

(4)
3. Which of the following is Antipyretic
 - (1) Penicilline
 - (2) Paracetamol
 - (3) Renitidine
 - (4) Chloroform
4. Fats are the ester of –
 - (1) Ethylene glycol
 - (2) Glycerol
 - (2) Polypeptides
 - (4) Sugar
5. Hydrolysis of oil by caustic alkali is called –
 - (1) Esterification
 - (2) Saponification
 - (3) Acetylation
 - (4) Carboxylation
6. Palmitic acid, stearic acid and Oleic acid belong to the family of
 - (1) Nucleic acid
 - (2) Amino acid
 - (3) Fatty acid
 - (4) Alkanoic acid
7. Which of the following is not glyceride –
 - (1) Fat
 - (2) oil
 - (3) soap
 - (4) 1 & 2 Both
8. Hydrolysis of fats and oils yields –
 - (1) Dihydric alcohol
 - (2) Trihydric alcohol
 - (3) Esters
 - (4) Monohydric alcohol
9. Quaternary ammonium salt of amines with chlorides or bromides as anions are called –
 - (1) Cationic detergents
 - (2) Anionic detergents
 - (3) Non-ionic detergent
 - (4) All of these
10. Correct formula of sodium stearate is –
 - (1) $C_{17}H_{33}COONa$
 - (2) $C_{13}H_{27}COONa$
 - (3) $C_{17}H_{35}COONa$
 - (4) $C_{15}H_{31}COONa$
11. Glyceride of stearic acid is called –
 - (1) oil
 - (2) Fat
 - (3) soap
 - (4) Detergent
12. Which of the following detergent is cationic
 - (1) Sodium Lauryl sulphate
 - (2) Sodium dodecyl benzene sulphonate
 - (3) Cetyltrimethyl ammonium bromide
 - (4) Pentaerythrityl stearate
13. Which of the following statement is not true –
 - (1) Some disinfectants can be used as antiseptic at low concentration
 - (2) sulphapyridine is a synthetic antibacterial
 - (3) Ampicillin and Amoxycillin are natural antibiotic
 - (4) Aspirin is analgesic and antipyretic both.
14. Which of the following medicines are the derivatives of malonyl urea. (Barbituric acid)
 - (1) Antibiotics
 - (2) Antiseptics
 - (3) Analgesics
 - (4) Tranquillisers
15. Which of the following is not an example of an analgesic medicine –
 - (1) Codein
 - (2) Morphine
 - (3) Veronal
 - (4) Aspirin
16. Which medicine was discovered by Alexander Fleming –
 - (1) Penicillin
 - (2) Streptomycin
 - (3) Chloramphenicol
 - (4) Chlordiazepoxide
17. Which of the following medicines is used in the treatment of Typhoid –
 - (1) Penicillin
 - (2) Bithional
 - (3) Northin drone
 - (4) Chloramphenicol

- 18.** In the manufacture of soap the important byproduct obtained is –
(1) Glycerol (2) soap
(3) Sodium carbonate (4) Glycol
- 19.** Dettol consists of –
(1) Cresol + ethanol
(2) Xylenol + terpineol
(3) Chloroxylenol + Terpineol
(4) None of these
- 20.** Which is incorrect statement –
(1) Boric acid in dilute aqueous solution is weak antiseptic for eye.
(2) Chloramphenicol used in the treatment of typhoid, eye infection and pneumonia.
(3) Broad spectrum antibiotics effective against both gram positive and gram negative bacterias.
(4) Bithional is used as antifertility drug.
- 21.** Which chemical is responsible for stimulate inflammation in the tissue and cause pain.
(1) Hydrochloric acid (2) Histamine
(3) Prostaglandine (4) All of these
- 22.** Which is used as antacid
(1) Sodium benzoate
(2) Saccharine
(3) Sodiumbicarbonate
(4) Hydrochloric acid
- 23.** Which is incorrect statement
(1) Bithional is added to soap to impart antiseptic properties
(2) Sulphanilamide used in the formation of sulpha drugs.
(3) Aspartame is the most successful and widely used artificial sweetener
(4) Soframycin used as an disinfectant.
