

ENVIRONMENTAL CHEMISTRY

1. Select the incorrect statement:-
 - (1) Human being along with other organism live in troposphere
 - (2) Troposphere and ionosphere are studied as atmospheric pollution
 - (3) Stratosphere prevents about 99.5 % U.V. radiation
 - (4) NO_2 is responsible for brown haze in photo chemical smog.
2. Which of the following promote the conversion of SO_2 to SO_3
 - (1) O_3 (2) H_2O_2
 - (3) NO_2 (4) Both (1) & (2)
3. Which of the following is carcinogenic-
 - (1) O_3 (2) NO_2
 - (3) Hydrocarbon (4) PAN
4. Which of the following block the delivery of oxygen to the organs and tissue
 - (1) CO (2) CO_2 (3) SO_2 (4) O_3
5. Which of the following is mainly responsible for global warming-
 - (1) O_3 (2) CO_2
 - (3) Water vapour (4) NO_2
6. Which is responsible for the pH of normal rain water 5.6 :-
 - (1) SO_2 (2) NO_2 (3) CO_2 (4) All
7. In India Taj Mahal is affected by acid rain due to-
 - (1) H_2SO_4 reacted with CaCO_3 to form pits on their surface.
 - (2) HNO_3 makes yellow coating
 - (3) Both
 - (4) None
8. Select the incorrect statement
 - (1) Classical Smog occurs in cool humid area
 - (2) Photo chemical smog occurs in hot dry area
 - (3) Photo chemical smog is also known as oxidising smog
 - (4) CFCs are non reactive and highly inflammable
9. Which of the following is not formed in photo chemical smog.
 - (1) Formaldehyde
 - (2) Acrolein
 - (3) Peroxy acetyl nitrate (PAN)
 - (4) Poly acrylo nitrile
10. Which of the following plant can not metabolise the nitrogen oxide
 - (1) Pinus (2) Vititis
 - (3) Pyrus (4) Neem
11. Ozone depletion is pollution of
 - (1) Stratosphere (2) Ionosphere
 - (3) Mesosphere (4) Troposphere
12. Ozone layer protect human being from which rays-
 - (1) IR (2) U.V
 - (3) X-Ray (4) Microwave
13. Which radical is released by CFC when it reaches to stratosphere-
 - (1) F° (2) Cl° (3) C° (4) Br°
14. In winter season which acid is formed over polar stratospheric cloud.
 - (1) HOCl (2) HClO_2
 - (3) HClO_3 (4) HClO_4
15. Select the incorrect statement-
 - (1) If the concentration of DO is below 6 PPM then growth of fish gets inhibited
 - (2) In cold water DO is maximum 30 PPM
 - (3) BOD is amount of oxygen required by bacteria to break down the organic matter present in water.
 - (4) Clean water would have BOD value is less than 5 PPM
16. PCB's stand for-
 - (1) Poly chloro biphenyls
 - (2) Poly chlorinated biphenyls
 - (3) Primary chloro bisulphite
 - (4) Poly cables

- 17.** Excessive growth of algae in water is called–
 (1) Eutrophication (2) algation
 (3) Fungation (4) Implantation
- 18.** F^- ion makes the enamel on teeth much harder by–
 (1) By making a layer
 (2) By converting hydroxy apatite in to fluoro apatite
 (3) By converting fluoro apatite in to hydroxy apatite
 (4) By converting fluoro apatite in to calcium fluoride
- 19.** What concentration of fluoride causes Teeth decay–
 (1) 2 ppm (2) 5 ppm
 (3) 7 ppm (4) 12 ppm
- 20.** "Blue baby syndrome" is caused by Excess of–
 (1) F^- (2) NO_3^-
 (3) Pb (4) SO_4^{2-}
- 21.** Which of the following concentration of metals in drinking water is not prescribed–
 (1) Fe 0.2 ppm (2) Cu 3.0 ppm
 (3) Cd 2.0 ppm (4) Zn 5.0 ppm
- 22.** Which of the following were used as pest controlling agent prior to world war-II–
 (1) DDT (2) Morphine
 (3) Nicotine (4) Equanil

ANSWER KEY

Q.No.	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Ans.	2	4	3	1	2	3	3	4	4	4	1	2	2	1	2
Q.No.	16	17	18	19	20	21	22								
Ans.	2	1	2	4	2	3	3
